# For both government municipalities and private waste companies, WasteTrail is your all-in-one solution

We take care of every detail of waste collection, simplifying the entire process.

## TRACK DAILY COLLECTIONS AND GET REAL-TIME WORK HOUR INSIGHTS

Easily spot missed points and monitor trip completion without alerts.

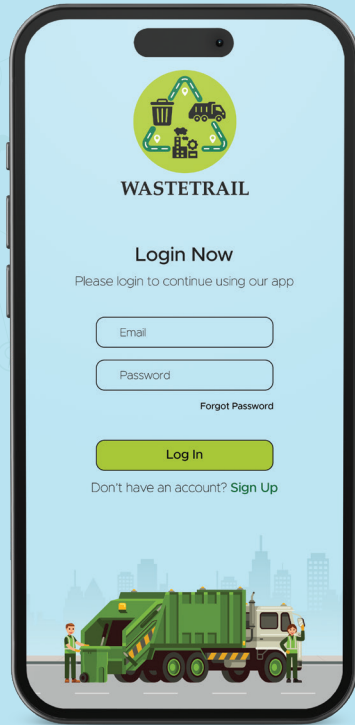

# ONE-STOP DASHBOARD

## Access to everything you'll ever need!

Stay on top of daily collections and monitor work hours as they happen. Instantly notice when your team skips important points and see how many trips they complete without any issues.

REVIEW WASTE COLLECTION STATISTICS

CATCH UP WITH ALERTS AND TASK VIOLATIONS

MONITOR FUEL CONSUMPTION AND REFILLS

REMINDERS FOR UPCOMING FLEET MAINTENANCE

## Analytics at your fingertips: Harness real-time data to produce impactful results.

Your business thrives on fleet performance, and every choice you make impacts their uptime.

Empower yourself with real-time data to ensure you're always making the right call.

### Fleet Activity Reports

- Playback vehicle routes & review their stoppages
- You will see where and when you drivers speeded
- Know ignition on/off times and see how much your fleets traveled per day

### Maintenance Reports

- Review maintenance history for each vehicle
- Keep track of engine hours & the total distance traveled
- Automate scheduling and get reminded of servicing dates

### Fleet Expense Reports

- See how much your fleets are costing you per hour & per mile
- Account for fuel, tires, toll, insurance costs, & driver salaries
- Acknowledge maintenance costs, and cost of repairs after accidents

# "How Wastetrail works?"

Take control over your waste collection processes with GPS powered tool

Get notified when your crew misses or delays a collection

Get proof of task completion using photos, QR codes, & RFID

Connect with residents & be the first to react to their complaints

Assign waste collection points using Wastetrail app

A task is said to be complete only when all collection points along a route have been visited

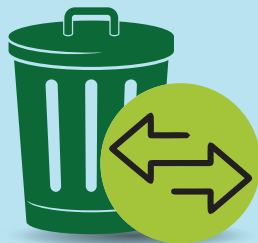

Keep track of collected waste & easily know when quantities are lesser than usual

**Task completion verification:  
Achieve the transparency you deserve**

Waste collectors can now snap photos of emptied bins as proof of their work, and scan QR codes (or RFID) on the bins after each cleaning. This ensures admins are always in the loop about their team's activities."

**Enhance on-site service**

**Streamline processes**

**Streamline processes**

**Streamline processes**

**Benefit from the perseverance and effort you put in**

Each year, global waste generation rises at an alarming rate, making the demand for sustainable waste management solutions more urgent than ever

**Household waste**

Making sure each dustin gets emptied regularly and on time

**Medical Waste**

Responsible waste disposal to prevent disease infestation

**Industrial Waste**

Measure the weight of collected waste with weight scale integrations

# Live Tracking

Explore a whole new level of tracking, beyond the ordinary!

Staying updated on waste collection tasks is crucial, and we know you want insights into your team's and fleet's performance. That's why we've streamlined it all onto a single screen! Check out what our live-tracking screen can do for you:

Red, Blue & Green dustbin icons indicate missed, in-progress & completed jobs

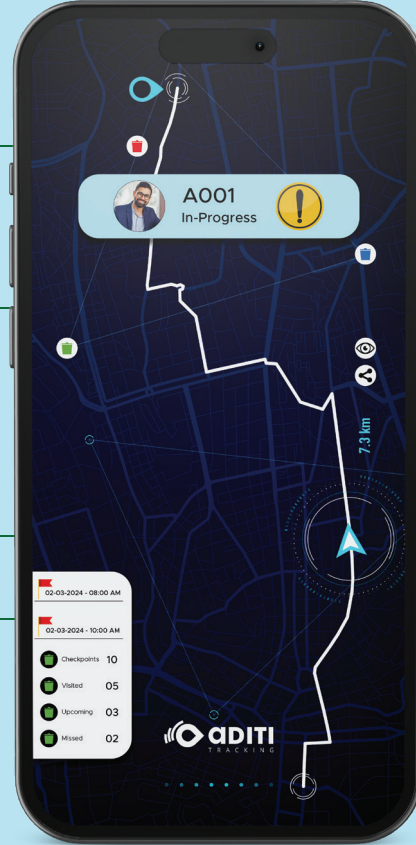

See the timing and type of alert occurrences along the route

Stay updated with live vehicle status and location. You can also playback past collection routes

Review the time of collection. Compare permissible halt times with actual ones
